Contents Volume 31

Vol. 31, No. 1

Electrification of pure water flowing down a trough set up with a resin sheet
M. Matsui, N. Murasaki, K. Fujibayashi, P.Y. Bao and Y. Kishimoto 1
Current distributions of negative D. C. corona on the plane for point-plane gap in nitrogen rich condition
A. Boudjella, M. Yumoto and T. Sakai 11
Space-charge dispersive transport in corona-charged dielectrics
V.I. Arkhipov, D.V. Khramchenkov, A.I. Rudenko and G.M. Sessler 21
Charge decay of electrets formed by ionizing radiation in air
B.A. MacDonald and B.G. Fallone 27
Electrical characterisation of ESD degradation in GaAs devices
A.J. Franklin and V.M. Dwyer 35
Electrical conduction in biaxially-oriented polypropylene
P. Karanja and R. Nath 51
Meeting Report 65
Calendar 69
Announcements 71

Vol. 31, Nos. 2 & 3. Special Issue on the 1992 EOS/ESD Symposium

Preface i
Contents iii
A newly observed high frequency effect on the ESD protection utilized in a gigahertz NMOS technology
H.T. Weston, V.W. Lee and T.D. Stanik 79
Latent damage and parametric drift in electrostatically damaged MOS transistors
M.J. Tunnicliffe, V.M. Dwyer and D.S. Campbell 91
ESD protection in a 3.3 V sub-micron silicided CMOS technology
D. Krakauer 111
Annealing of ESD-induced damage in power MOSFETs
D. Zupac, D. Pote, R.D. Schrimpf and K.F. Galloway 131
An investigation of BiCMOS ESD protection circuit elements and applications in submicron technologies
A. Amerasekera and A. Chatterjee 145
Electrical overstress (EOS) power profiles: A guideline to qualify EOS hardness of semiconductor devices
C. Difaz, S.-M. Kang, C. Duvvury and L. Wagner 161
On chip ESD protection using SCR pairs
G.D. Croft 177
From lightning to charged-device mode electrostatic discharges
D.L. Lin and T.L. Welsher 199

Techniques and methodologies for making system level ESD response measurements for trobleshooting or design verification
D.C. Smith 215
Shallow trench isolation double-diode electrostatic discharge circuit and interaction with DRAM output circuitry
S.H. Voldman, V.P. Gross, M.J. Hargrove, J.M. Never, J.A. Slinkman, M.P. O'Boyle, T.S. Scott and J.J. Delecki 237
Fieldemitter-based ESD-protection circuits for high-frequency devices and IC's
K. Bock and H.-L. Hartnagel 263
Experimental study of unprotected MOS structures under EOS/ESD conditions
W.D. Greason and K. Chum 281
A successful HBM ESD protection circuit for micron and sub-micron level CMOS
B.G. Carbajal III, R.A. Cline and B.H. Andresen 301
Integrated circuit metal in the charged device model: bootstrap heating, melt damage, and scaling laws
T.J. Maloney 313
ESD induced gate oxide damage during wafer fabrication process
S.U. Kim 323
The resistive phase of an air discharge and the formation of fast risetime ESD pulses
H.M. Hyatt 339
